EMAFIDO EMMANUEL ARIDON

Full-Stack Developer | Next.js · Go · Web3 & AI

+234 903 892 7320 | emmanuelemafido@gmail.com | github.com/Emafido | emmanuel-emafido.vercel.app

EDUCATION

University of Lagos (UNILAG) — B.Eng Systems Engineering *2024 – Expected 2028 | Lagos*

SKILLS

Languages: JavaScript, TypeScript, Go, Python, Solidity, Move, HTML / CSS

Frontend: React, Next.js, Tailwind, Framer Motion, GSAP, Zustand, Lenis

Backend: Go (Gin, GORM), Node.js, PostgreSQL, MongoDB, Neon, Supabase, REST APIs

Web3 & AI: Solidity, Move, Wagmi / Viem, Gemini API, Groq, Base, Sui, Foundry

EXPERIENCE

Elevvo — Front-End Web Development Intern *Oct 2025 | Lagos*

- Completed a 2-week intensive frontend programme; recognised for dedication and high-level performance throughout
- Delivered production-ready responsive UI components under senior engineer guidance, working directly from design specs into deployed code

ECX 5.0 — Engineering Career Expo | Technical Trainee, Frontend Development *May 2025 | Lagos*

- Mastered component architecture, responsive design, and modern web workflows under Training Lead Faisal Adams
- Practiced modern web workflows in a cohort setting, applying component-based frontend patterns to expo project exercises

PROJECTS

QuikAPI *Solo · Full-Stack Next.js · TypeScript · Groq AI · Zod*

- AI-powered REST API generator: plain-English description → live CRUD endpoints in under 30 seconds, zero backend code required
- Built Groq AI schema inference, visual schema editor, and copy-ready fetch / axios / curl code snippets

SerielleHealth *Solo · Full-Stack Next.js · Go (Gin) · Gemini API · WebSockets · PostgreSQL*

- Maternal health platform with Gemini AI care assistant and automated clinical alerts via real-time WebSockets
- Full production Go API with Gin, JWT authentication, and Neon PostgreSQL; live on seriellehealth.com

BEE Empire *Solo · Full-Stack Next.js · Go · Supabase · Cloudinary*

- Editorial fashion e-commerce storefront — Framer Motion, Zustand, and real-time admin panel with Cloudinary uploads
- Split architecture: Next.js frontend on Vercel + Go REST API on Render backed by Supabase

Ghost Intel *Team · Web3 Integration · Next.js · Solidity · Wagmi · Gemini · Base*

- Built Next.js UI and Web3 layer for an AI B2B lead enrichment platform — GTM Hackathon
- Integrated GhostCredits + GhostNFT contracts on Base Sepolia: wallet connection and on-chain reputation

SuiSecureDrop *Solo · Full-Stack Move · Sui · React · @mysten/dapp-kit*

- PIN-protected asset transfer on Sui blockchain — assets lock in vault; claimed via SHA3-256 PIN
- Authored Move smart contract and React frontend with dapp-kit wallet integration and TanStack Query

CERTIFICATIONS

- Design Thinking | HP LIFE | Issued Sep 2025
- Effective Leadership | HP LIFE | Issued Sep 2025
- Certified Ethereum Learner | HackQuest | Issued Oct 2025
- Competed in Squad 3.0, 234 AI, Solana OnchainED, GTM, and Build with AI Lagos hackathons
